## POOL CLOSURE FAQ

We understand that pool closures can be inconvenient, and we appreciate your patience as we work to ensure the highest safety and quality standards for our aquatic facilities. Below are answers to common questions about the pool closure.

- **WHY IS THE POOL CLOSED?**

The pool is closed for scheduled maintenance and facility improvements to enhance amenities, safety, and the overall guest experience. These renovations are made possible through funding from the Angleton Better Living Corporation and a Texas Parks & Wildlife Facilities Grant that allows us to invest in upgrades that support long-term community recreation and improve the quality of our aquatic facilities for all members.

- **HOW LONG WILL THE CLOSURE LAST?**

The pool closure began on December 1, 2025, and renovations are currently underway. We will share an official reopening date as soon as it is confirmed. Timelines may adjust depending on project progress.

- **WHAT WORK HAS BEEN COMPLETED:**

The images show the natatorium fully drained and under active renovation.

- The existing pool plaster has been removed, exposing the rough shell beneath in preparation for resurfacing.
- The small play structure and water features have been replaced, with new anchors installed for the updated structure.
- The large slide is undergoing repairs and maintenance to ensure long-term safety and performance.

- **WHAT IS STILL BEING WORKED ON?**

Additional repairs were identified during construction to ensure the facility meets safety standards and operates properly long term. Current work includes large slide repairs, decking improvements, and interior painting and finish updates. The pool will reopen once all required work is completed and inspections are finalized.

- **WHICH AREAS ARE AFFECTED?**

The closure includes the entire natatorium. Other facility areas, such as the weight room and gymnasium, will remain open.

- **WILL THE AIR TEMPERATURE OR HUMIDITY CHANGE WHEN THE POOL REOPENS?**

Not at this time. This round of repairs will focus on key facility upgrades, including the replacement of the toy feature, surface/decking repairs, large slide repairs, and grating replacement. While the HVAC system will remain the same for now, these improvements will help enhance the overall appearance, safety, and guest experience in the natatorium.

- **HOW WILL THE CLOSURE AFFECT AQUATIC PROGRAMS?**

Swim lessons and aquatic programs will resume once the natatorium reopens. Registration details will be shared closer to reopening.

Water Aerobics is **postponed** during the closure and will return when the pool reopens.
